

“FROM” or “IS”?

Some companies don't put their prices in their mag adverts, some even not on their web site.

Some refer to prices as “from”. At Dutton our price is “is”.

Use this form to work out how much your new kit will really cost you “on the road”(OTR):-

Parts required	Dutton S5 Phaeton	2 nd choice??	3 rd choice??
Full kit is – vat. Malvern kit car show special price up to June 02 (save £1000 - see order forms)	£9,967.00

Total on the road (OTR) price:- Dutton 5 kit inc vat is Typical MX5 SPORT donor (no vat) as pictured on “donor page”. (6) Deduct sellable MX5 parts (7)	£11,960.00 add:- £675 deduct:- £650		

<p>TOTAL OTR COST</p> <p>(8)</p> <p>NOTE:- The standard 1800cc MX5 is considerably less expensive compared to the top of the range 2000cc Sport model that we have priced out on here.</p>	<p>£11,985</p>		
--	-----------------------	--	--

(1) Don't forget if you buy "Starter kit (s)" you are financially committed to purchasing all the other packages, also check that prices for remaining "kit" won't go up during your build-up.

(2) If you have a windscreen on your kit it must have fully functioning wipers/screenwash/heater to de-mist entire screen to pass IVA (and it will be tested). If your forward "Field of View" looks thru a piece of glass or plastic then it is by definition a windscreen.

Verbatim from IVA manual Section 32 Forward Vision:-

"Check that when seated in the driving position, the driver has a full un-obscured view of the road to the front and forward of the near side and offside of the vehicle (90° each side of straight ahead). The lower edge of the forward field of view must not be above the "windscreen horizontal plane" as defined in Annex 1 of this section"

(3) It may seem petty to mention a battery at £60+ or radiator at £150+ but if the one from your donor doesn't fit then that's more cost - it all adds up.....

(4) How to NOT get a Q number plate:-

- a) get receipt for MX5
- b) get V5C for MX5 BEFORE YOU STRIP IT DOWN, The V5C does not have to be in your name. If you were not given the V5C then search "DVLA Form V62" and send to DVLA with cheque or Postal Order for £25. Nice to see DVLA is up to speed with the modern ways to pay and only accepts cheques or Postal Orders (whatever they are) with your V62.
- c) Remember as soon as you have a V5C to SORN it.
- d) Don't use parts from a second donor car.
- e) Take photos during your build up.

(5) MX5 parts requiring free factory modification (these can be modified while you wait/load up your 5):-
prop shaft
steer column

Black plastic rear 3 compartment “glove” box (behind seats)
Both wiper control links (motor to wheel-box)
Exhaust manifold

(6) The real “cost” of the MX5 Sport as on the Copart invoice (see donor page) was only £675, we took the quick and easy (and lazy) but more expensive route and purchased thru Copart. If you take your time and purchase privately and don’t use a dedicated internet auction site that’s the sort of price you should be aiming for.

(7) The industry standard is that you should get “up to £650” if you sell off unwanted MX5 parts. This actually makes sense - if you were a car breaker you would in all circumstances expect to get back a lot more than your original outlay.

(8) OTR price does not include Government IVA test, which you will have pay regardless of which make of kit you buy. When you have almost finished your Phaeton fill in IVA application form, search “DVSA IVA 1C application form”. If you get stuck filling in any DVLA or DVSA form we operate a free hand holding service to complete it. (we have after all already completed almost 300 of these with the amphibs and NONE of them ended up with a Q plate).

Your new Dutton V5C will look like this:-

B. Date of first registration:- 2025.....

D.1. Make:- DUTTON.

D.3. Model:- PHAETON.

D.5. Body type:- SPORTS.

E. VIN:- DUTT0NPHAET0N8xxx

With a new registration number containing the year identifier from the Donor car. i.e. if your MX5 registration number had 12 then 12 would also be in the Dutton registration number.

1/ This will give you the option to put a cherished number plate on your Phaeton (subject to DVLA rules).

2/ You can never put a cherished number plate on any Q registered car.

Those of you with a keen eye will notice both the O’s in the VIN have been changed to zero’s. This is because DVLA don’t allow O, Q or I in a VIN.

Info correct at May 2025 (if there are any other large items that could be added to this list or errors please advise)
